October 6 – 28, 2006**

NOAA Teacher at Sea: Karolyn Braun
NOAA Ship KA'IMIMOANA
Mission: TAO Buoy Array Maintenance
Saturday, October 14, 2006

Plan of the Day

100 CTD Profile 1.5S/155W
600 CTD2S/155W
TAO buoy Recovery and deployment
2100 CTD 2.5S/155W

Today has been a day of much needed rest. I awoke at midnight to conduct the 1 a.m. CTD profile, which went extremely well. Once my head hit the pillow I was out, awaking around 8 a.m. I checked my email and tried to read some but fell asleep and woke-up around 11 a.m. I went outside to see if any help was needed and they told me not to worry about it so I decided to complete some schoolwork that needed to be done. I felt like I was at the office without my students. I miss them a lot; they definitely make my life interesting. I have been getting several emails from them, which make my day. I ended my evening with a CTD profile and I was off to bed.

The sun setting on the southern Pacific Ocean.
