Log 10

Science Log #10

In port – Charleston, South Carolina
March 28, 2006

Yesterday we had a final meeting of “all hands.” At the meeting, we presented Captain Patrae and Dr. Molly with gifts from our schools. Students from Searles designed sea-life posters that had their pictures on it, and students from Cabello signed their class photo to be hung on the ship. At this meeting we thanked all the officers, crew and science party.

In closing our logs, we would like to honor everyone we sailed with by presenting a pictorial display (a display of pictures). Thanks for letting us sail with you, we’ve learned a lot, had great conversations with our students, and most importantly you’ve shared with us and our students the love of the sea!
